

Kettin

Bandung, West Java

+62 888-0634-6148 | kettin@binus.ac.id | [Github](#) | [Portfolio](#)

Fifth-semester Computer Science student with a strong foundation in programming and software engineering, built through coursework in programming, data structures, algorithms, databases, and computer networks. Experienced in applying these fundamentals to academic and personal projects, developing end-to-end web and mobile applications using Node.js, React, Flutter, and PostgreSQL. Also experienced in containerization and foundational CI/CD practices with Docker and GitHub Actions, with an emphasis on building secure and reliable software.

Education

Bina Nusantara University

(2024 - Present)

Computer Science - GPA 3.96

Experiences

Lab Curiosity (Competition Community in BINUS)

(Dec 2024 - Present)

Active Member

- Mentored and guided 7+ junior students in preparing for and navigating various academic competitions.
- Actively participated in 10+ competitions to challenge and expand technical and foundational skills.
- Engaged in multiple skill-building workshops and training sessions focused on modern technology.

Security Manpower Training Program (Collaboration of INKOR and NSHC South Korea)

(Aug 2026 - Sept 2026)

Trainee

- Completed intensive training covering Linux, Web & Network Security, Cryptography, Digital Forensics, ICS/OT, OSINT, AI Security, and VAPT.
- Developed 7 learning video and applied the acquired knowledge in a hands-on Web VAPT final project.

Masimuda Creative (Multimedia Studio)

(May 2024 - Jun 2026)

Freelance UI/UX Designer

- Designed 12+ digital interfaces and visual assets across projects of varying scope, aligning user needs and brand guidelines with front-end requirements to support efficient development.
- Developed intuitive user flows and interaction patterns tailored to client needs, ensuring brand consistency and facilitating smoother design approval and implementation.

Binus University

(Aug 2025 - Sept 2026)

Freshmen Leader & Freshmen Partner

- Lead and guide 50+ freshmen to ensure the smooth execution of the First Year Program before the first semester begins
- Mentor and assist 9 students throughout their first year (12 months) to help them adapt to university life
- Act as a guide to ensure a seamless academic and social transition during their foundational year

Teach For Indonesia

(Sept 2024 - Dec 2024)

Volunteer Tutor

- Taught Mathematics and English to 7 elementary students through interactive learning activities.
- Adapted teaching methods to students' learning needs and collaborated with fellow volunteers throughout the program.

Future Maker

(Jul 2025)

Registration Committee

- Managed registration and administrative verification for 20+ finalist teams during the competition's final stage.
- Coordinated participant requirements and administrative processes to support the smooth execution of the final stage.

Skills

Technical skills

C, Python, Java, Software Development, Web Development, Object-Oriented Programming, Data Structures & Algorithms, Database Design & Normalization, SQL, Network Routing, Subnetting, Access List, Web Security, VAPT

Stack & Tools

React, Node.js, Express.js, PostgreSQL, Prisma, Flutter, Provider, Dart, Git, GitHub, Docker, GitHub Actions, CI/CD

Soft skills

Problem Solving, Time Management, Target Oriented, Effective Communication, Collaboration, Adaptability Under Pressure

Projects - [View My Portfolio](#)

Washly: On-Demand Laundry Platform

Developed a full-stack laundry service platform using Flutter, Node.js, Express.js, and PostgreSQL, implementing multi-role workflows, dynamic pricing, warranty claims, and payment integration.

MakeMeUp: MUA Discovery & Booking Platform

Developed the back-end of beauty service platform connecting customers with makeup artists, implementing personalized filtering, booking workflows, and payment integration.

Tanti Logistics Database Normalization

Designed and implemented a relational database system, applying database normalization up to 3NF and developing SQL-based data management.

Cisco Packet Tracer: Subnetting & Routing

Designed and configured a network topology using Cisco Packet Tracer, implementing subnetting, VLSM, OSPF routing, and Access Control Lists (ACLs).

Datsruct: Warehouse Management System Using C

Developed implementations of fundamental data structures including Binary Search Trees, Linked Lists, Hash Tables, Min-Heaps, Queues, and Stacks to demonstrate core programming and algorithmic concepts.

PassVault: Devsecops Pipeline

Developed a password management application with a security-focused CI/CD pipeline, integrating automated code analysis, vulnerability scanning, and secret detection using GitHub Actions.

Research: Impact of Text Pre-Processing on Sundanese Sentiment Analysis

Fine-tuned IndoBERT on a Sundanese Twitter emotion dataset to evaluate the impact of token removal, achieving a macro F1 of 0.9502 and demonstrating that reductive pre-processing significantly degraded model performance.

Certification

• Microsoft Certified: Azure AI Fundamentals - View Credential	2026
• Oracle Databases for Developers Fundamentals - View Certificate	2025
• Google AI Professional Certificate - View Credential	2026
• Python 101 for Data Science - View Credential	2025
• ID Networkers, Secure by Design: Building Security into Development - View Certificate	2026

Language

• Indonesian	Native
• English - View Credential	Advanced

Achievements

• Dean's List Award, School of Computer Science BINUS University	2026
• 1st Place, IDSC International Business Case Competition, Airlangga University	2025
• 1st Place, Invention Udayana UI/UX Design Competition, Udayana University	2025
• 1st Place, Astra Motor Business Case Competition Jakarta Region, Astra Motor	2025
• 1st Place, CCI Summit UI/UX Design Competition, Telkom University	2024
